Objective

Seeking a Junior Backend Developer to apply and expand skills in API design, databases, and scalable systems. Long-term goal is the transition into a full-time Software Engineer role.

Skills

- Languages: JavaScript, TypeScript, Python, SQL
- Technical tools: NestJS, Express.js, Node.js, React.js, Django Framework
- Databases: PostgreSQL, MySQL
- Other: RESTful APIs, JWT, Swagger, Git

Experience

NAB Innovation Centre Vietnam - WeCamp Program - Software Engineer

Dec 2025 - March 2026

- Trained in JavaScript, DSA, SDLC, testing fundamentals, React, Node.js, Express, and SQL/NoSQL databases
- Applied algorithmic problem-solving, Big-O analysis, and coding exercises to optimize code efficiency
- Deepened knowledge in Agile/Scrum workflows, Git version control, and collaborative development

Backend Developer - PlatoScience & RMIT University (Capstone Project)

March 2025 - Sept 2025

- Collaborated with PlatoScience to design and implement an individualized brain stimulation system for tDCS treatments.
- Contributed to building and developing the backend features using **Django REST Framework**, **PostgreSQL**, including authentication, assessment workflows, and treatment recommendations APIs.
- Optimized application via **fixing bugs**, **datatype validation with Serializer**, and **API documentation with Swagger** to support faster API integration.

Javascript Dev Intern - Twendee Software

Sep 2024 - Nov 2024

- Developed API endpoints using **Nest.js**, **PostgreSQL**, **Prisma** and **Swagger**, implementing core user workflows.
- Practiced in designing and optimizing data models and database interactions.
- Contributed to developing the client-side using **React.js**, **Next.js** and integrating with APIs.

Projects

Tet Task Management Web Application - Size: 6

Feb 2026 - March 2026

- Skills: TypeScript
- Role: Software Developer
- Intro: A simple application to handle users' tasks and shopping lists during the Tet holiday.
- Collaborated with one member to develop and implement the shopping list-related features.
- Handled fixing bugs in UI and logic of the shopping list page.
- Github link: [Capstone project - WeCamp batch 9](#)

Individualized Brain Stimulation - RMIT University & PlatoScience - Size: 8

Mar 2025 - Sep 2025

- Skills: Django REST Framework, React Native, PostgreSQL
- Role: Backend developer
- Intro: An application for generating personalized tDCS treatments for depression patients based on their health data and daily depression tests. Continuously monitored and updated users' wellness progress throughout the treatment.
- Worked on developing and implementing the business logic, adapting to stakeholders' requirements, for creating an assessment feature and an account feature.
- Collaborated on fixing bugs for all features.
- Project link: [Capstone Project - RMIT University & PlatoScience](#)

Education

RMIT University Vietnam

2021 - 2026

- Major: Bachelor of Information Technology
- Minor: Mobile and Web Development
- Courses: Full Stack Development, Data Structures & Algorithms, Cloud Foundation, Android Development, etc.

Languages

- English: Proficient, able to understand and communicate in both general and IT-related topics.
- Vietnamese
